## STATEMENT

The product is good packing when ship out the factory. All users should strictly abide by the warnings and instructions stated in this manual, any damage and results due to misuse and the neglect of this operating manual will be excluded from the deal responsibility this manual will not informed in additionally if have technical changes.

## 1. PRODUCTION INTRODUCE

Thank you for choosing this E products, this model is the moving head light which is the latest development of the smart, efficient products, beautiful shape, smooth R & D, combined with the advanced technology of today's stage lighting products with international advanced electronic control technology and excellent user-friendly industrial design, fully comply with CE standard, accepted international standard DMX512 signal mode.

EXX-ML Beam use efficient lamp and short distance condenser system, coupled with the high-quality optical lens components, Gorgeous color and clear gobos, sharp and uniform output light. Chinese/English language selected.

Operate menu intuitive and fast; The display can be inverted 180 °. DMX512 channels optional. Horizontal scan: 540 ° vertical scanning 270 °. The color wheel is combined with white and 14 colors. The static gobos is combined with white + 11 gobo + 3 color gobo.

5 kinds of prism effect

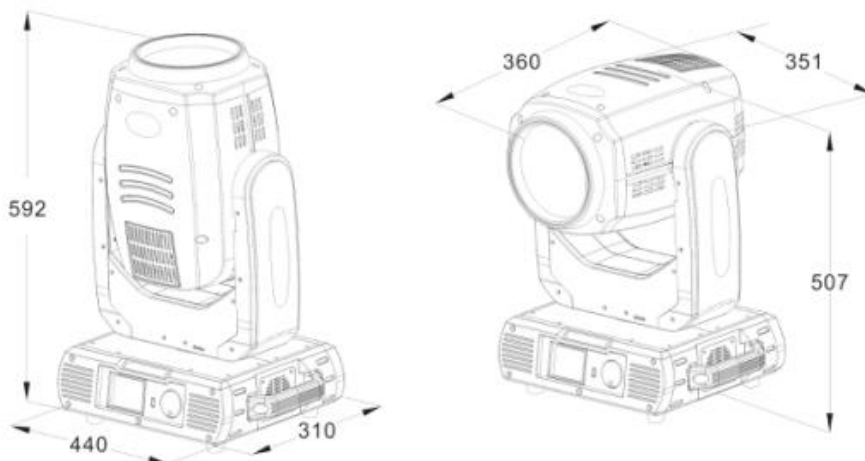

6 facet+12 facet prism+ 6 linear prism, Frost function; +16 facet prism rotation

Beam angle : 2°

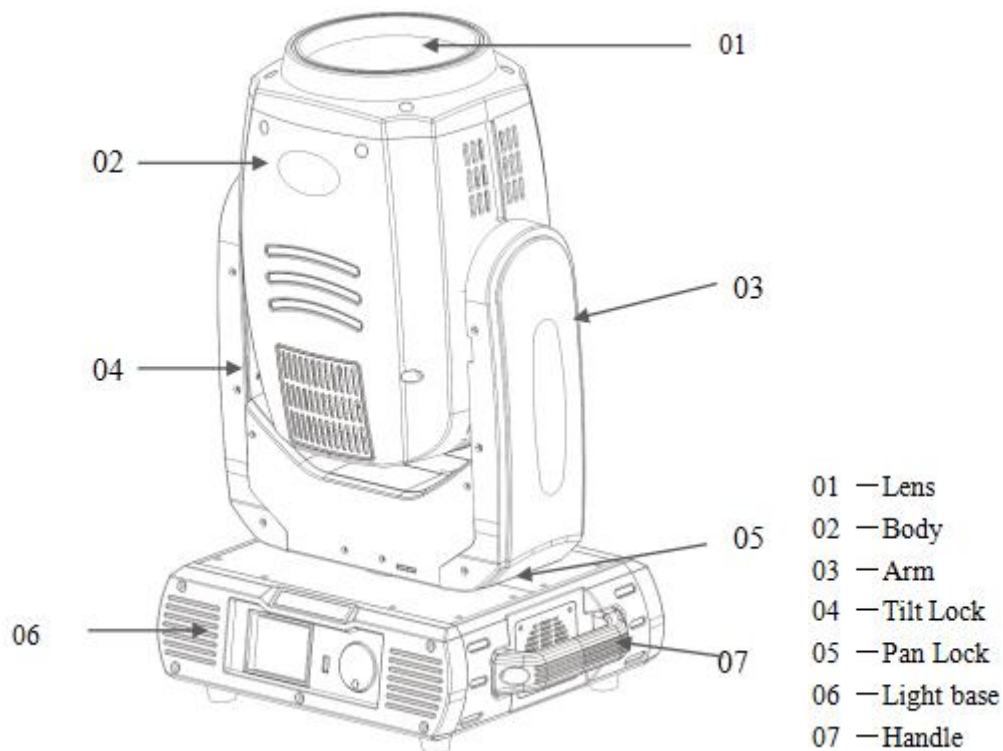

0-100% mechanical dimming, mechanical strobe, speed adjustable strobe effect and gobo shaking effect, over-heat protection function.

## 2 FIXTURE SIZE

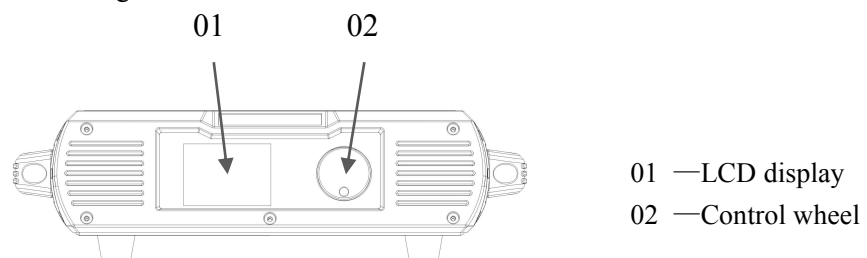

Size: 440(L)\*310(W)\*592(H) mm

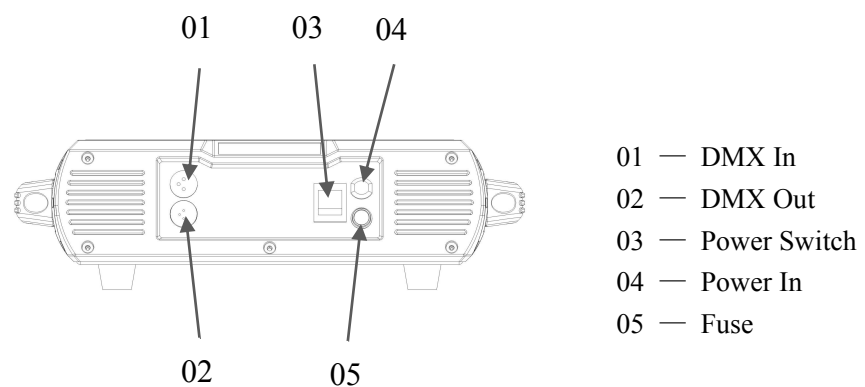

### 3. PARTS INTRODUCE

EXX-ML Beam 17R 350W each part of product structure and main composition product name description for better know the light unit

**EXX-ML Beam 17R 350W Control panel function introduction, mark for the part name on the panel, familiar with the function of every part.**

## 4. SAFETY INFORMATION

### Safety warning message

This product is only suitable for professional use, and does not apply to security for other purposes. After you got the lights, please check the package whether have any damage caused by transportation. If there is any damage, do not use this fixture, and please contact the dealer or manufacturer as soon as possible. This product is only suitable for indoor, IP20 protection class. Lamps should be kept dry to avoid Moisture, overheating or dusty environment. Prevent lamps come into contact with water or any other liquid. The use of this product should pay attention to: fire, heat, electric shock, ultraviolet radiation, the lamp to explode or Shedding caused serious or fatal injury. Need to read the instructions before use energized or installing. Follow through the operation of security methods and pay attention to the warning signs on the specification and equipment. If you have any problem for how to safely operate the equipment. Please contact your dealer.

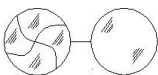

#### 4.1 ANTI-HIGH TEMPERATURE

$t_a = 40^{\circ}\text{C}$

Please don't use the equipment if the temperature above  $40^{\circ}\text{C}$

#### 4.2 BURST PREVENTION

The lens should be changed if had damaged or any problems. Don't change the non-original manufacturer lens.

Len size:  $\Phi 158 \times 43 \text{ mm}$

#### 4.3 TO PREVENT FALLING WOUNDING

Please don't move the package by one person only.

When Hang the fixture, please must verify that the facilities to be able to withstand the weight of the lamps at least 10 times more.

Please make sure the Mounting hardware is strong enough no any damage, and insurance for the safety rope as auxiliary security fixed in other facilities will need to verify before installation. Installing or removing the equipment, to make the pulley below the work location.

#### 4.4 UA PROTECTION AND THE BULB EXPLOSION

Prohibit straight viewpoint with exposed bulbs to avoid UV damage to the eyes;

Do not use the equipment without the lens screen and the lid;

The lens and the light head covers should be timely replaced if any damage to rupture

The Fixture should be used with the protection screen together.

#### 4.5 PREVENTION OF ELECTIC SHOCK

The electrical connection must only be carried out with corresponding qualifications;

Before installing, make sure you use the power voltage lamps must comply with the identified power, voltage and have an overload or leakage protection;

Each lamp must be properly grounded, installed in accordance with the relevant standards;   
Cut off the power when stall or replace the lamp and the fuse;   
Prohibit the use of a lightning storm or wet environment.

#### 4.6 TO PREVENT BURNING OR FIRE

1. The fixture can be mounted directly on the surface of ordinary combustible material. 
2. Do not short-circuit temperature protection switch or fuse, use the specified type of fuse.
3. The equipment must be installed away from inflammable and explosive materials.
4. The equipment should be projected range of 15 meters away objects and projectiles temperature less than 60 ° C  15m 
5. Fan or ventilation, at least in the range of 0.5 meters can not be an obstacle.
6. Do not place any object on the lens.
7. Handling at least allow the device to cool for 20 minutes. 
8. Do not replace the non-original parts.

#### 4.7 TRANSPORT PROTECT LOCK

In order to protect the light, there is a protect lock; During the transport , the lock catch position need lock in the center, and the fixture keep in vertical state.

#### 4.8 ABOUT PACKING

1. Before packed, make sure power is off, and wait for at least 20mins for cooling down.
2. Before clean the fixture, make sure X, Y axis protect lock closed.
3. After packed by plastic bag, high-lift the fixture with two handles besides the product. put the product into the fly-case up-side-down.
4. After packed the product, put the accessory into the accessory case, then closed and lock the fly-case.
5. Fly-case only up stacked two layers. Prohibited upside down
6. When packed with carton box, equipment should be put into the foam first, then set into a carton, pay attention to the vertical position. 

#### 4.9 UNPACKING

Note: Before unpacking check the damage is whether due to the transportation or not, if you find any such damage, please do not use this item, and contact with the dealer or manufacturer as soon as possible.

1. Open the fly-case, and discover the inside plastic bag.
2. High-lift the product by two handles beside the bottom base and move it out.
3. Before power on, make sure you have opened the X, Y axis lock!

**Attention!**

**Must use two clamps fix the fixture, and tighten the clamps with 1/4 lock, only fully clockwise rotate 90 ° then can lock the fasteners. Add one safety insurance rope on the hole of**

**light base. pls attention not connect to the transport handle.**

Attention! One product only can accept one input one output. DMX512 cable must use the professional shielded twisted pair cable; standard loudspeaker cable is not reliable to control the long-range data. 24AWG cable is suitable for more than 300 meters long-distance signal transmission and must add DMX 512 signal amplifier.

Do not use two outputs to separate the connection, if separate a continuous connection to branch, DMX512 splitter is necessary.

If use the DMX512 splitter. At first connect DMX512 Splitter input terminal to controller .And then connected from the splitter output terminal to next device.

Do as above guide to connect other device, and finally coupled with terminal insertion

## 5. PACKAGE

EXX-ML Beam packed with fly-case of two in one ,or carton box. Attach follow accessory.

### ACCESSORY

CONTENT	QUANTITY
USER MANUL	1
HANG FIXTURE	1
SIGNAL CABLE	2

## 6. AC POWER

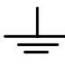

### VOLTAGE, POWER, FUSE SPECIFICATION

Input Voltage	Total Power	Frequency
110-240V	510W	50/60HZ

Fuse voltage	Electronic current	Specification
250V	10A	5×20

### EXX-ML Beam 17R 350W Power connection attention:

Attention! The equipment must be operated by professionals; Make sure that the voltage of power supply must be comply with the voltage identified on the lamp, and must have an overload or leakage electrical protection.

Live wire(L)	Null(N)	Ground wire	
RED	BLUE	Yellow +Green	

## 7. LAMP MODEL AND REPLACE

### EXX-ML Beam 17R 350W LAMP

LAMP MODEL	POWER	LIFE/HOUR	LUMEN
------------	-------	-----------	-------

YODN MSD 350 S17	350w	1500 HOURS	7400K
---------------------	------	------------	-------

**WARNING! There is a safety hazard or damage if install similar bulb To reduce the risk of damage to light ,do change the lamp before using time over 125% of lamp life .**

## LAMP REPLACE

Attention! When replace the lamp is forbidden to touch lamp with bare hand, to avoid the greasy dirt stains filament. filament must be kept clean. Disconnect the power. Before replace lamp, fixture need 20 minutes for lamp cooling. Fasten the head with Y axis protect lock in 60 ° position.

1. Use cross screwdriver to open

(picture 1)

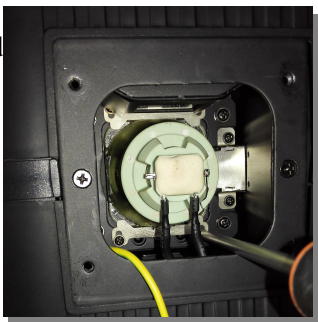

(1)

2. After open the cover,you can see the lamp. Please wait the lamp be cool after used but not touch it in hot status.(picture 2)

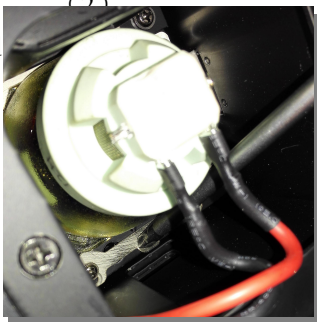

(picture 2)

3. One hand

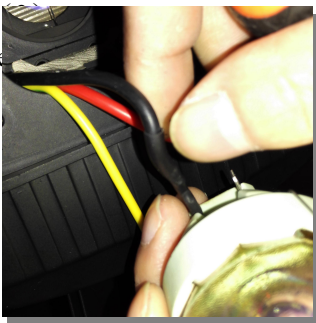

er hand hold

res(picture 3,4)

(2)

4.after take apart the lamp, please check the lamp effect.(Picture 5)

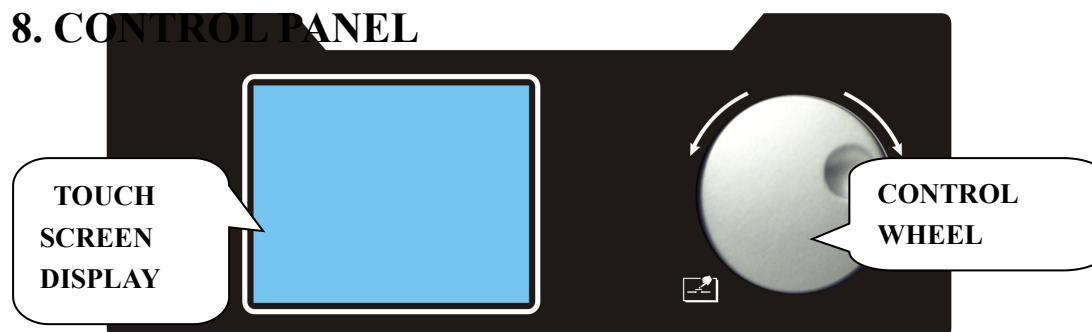

will make the light better

(5)

5.install the lamp after replaced.

## 8. CONTROL PANEL

Touch screen display: Display the data information and control operation;

**Control wheel: can turn right,left and enter;**

Turn left: Data increasing, scroll menu;

Turn right: Data diminishing, scroll menu;

Enter: OK
