WHY BUY A LEATHERMAN?

In 1975, Tim Leatherman (totally picky engineer) found himself traveling through Europe with a tight budget and a cranky car. His trusty scout knife just couldn’t handle the job. Tim wished he had a compact set of tools including full-sized pliers. Back home, he put his engineering skills to work and after seven years

(picky, picky, picky), the original Leatherman tool was perfected. Why should you buy a Leatherman? Tim’s standards for quality, durability, precision and attention to detail are what make Leatherman products like no others. Before a Leatherman product reaches you, we’ve already tested and

inspected each part numerous times. Even cosmetic flaws no bigger than a speck of pepper are not acceptable. We are experts. It’s all we do. We’re not only the original; we’re the world’s leader. Put it to the test for yourself. You’ll be pleased you bought a Leatherman.
