

AXISDigital Mixing System

The Mackie AXIS" Digital Mixing System delivers unmatched speed, visibility and customization for professional production and install.

With full Dante* integration, the modular AXIS system combines the power of the 32-channel DL32R* digital mixer and innovative DC16* control surface to deliver a live sound solution with stunning workflow efficiency.

Large, high-resolution screens provide class-leading readability and the unique SmartBridge™ intelligently handles up to three iPad® devices. AXIS delivers unparalleled visual feedback and customization that results in dramatically faster workflow.

Complete with flexible 32×32 recording and a wide selection of powerful DSP, the AXIS system delivers a forward-thinking, modular digital mixing solution with more features per price than any other digital mixer available.

AXIS DIGITAL MIXING SYSTEM:

- 32-Channel Digital Mixing System for professional production and install
- Flexible modular system with unmatched speed, visibility and customization
 - DL32R Powerful 3U rackmount digital mixer
 - DCI6 Innovative, workflow-driven control surface
- Intelligent surface-to-wireless mixing via SmartBridge[™] and Master Fader iOS control app
- Flexible 32×32 recording/playback
- Complete Dante® interoperability

DL32R DIGITAL MIXER:

- 32 mic/line inputs featuring low-noise, recallable Onyx+™ mic preamps
- 18 fully-assignable outputs with flexible I/O routing
 - 14 balanced XLR line outputs
 - Stereo AES digital output
 - Stereo TRS monitor outputs
- Wide Selection of Powerful DSP
 - 36 input channels with 4-band PEQ + HPF, gate, compression and RTA/spectrograph
 - 32 stereo-linkable input channels
 - 4 stereo-linkable return channels*
 - 28 output busses with 4-band PEQ + HPF/LPF, 3I-band GEQ, comp/limiter, alignment delay and RTA/spectrograph
 - 14 stereo-linkable aux sends
 - 6 stereo-linkable matrix busses
 - 6 stereo-linkable subgroups*
 - Main L/R busses
 - 6 VCAs and 6 mute groups
 - 3 stereo FX processors with dedicated sends and returns
 - Full I/O routing with A/B sources per channel
 - 32×32 routing of any signal on/off a Dante network
 - Assignable oscillator including pink/white noise and sine waves
 - Modern and Vintage options per processor
- Flexible Multi-Track Recording and Playback
 - 32×32 recording/playback direct to USB 2.0 HDD
 - 32×32 USB 2.0 audio interface for Mac and PC
 - Simultaneous recording using included Dante Virtual Sound Card
- Compact 3U rackmount design perfect for install or portable applications
- Personal monitor mixing using up to 20 iPad[®], iPhone[®] or iPod touch[®] devices

See Supported Devices on page 4 for complete compatibility information.

iPad, iPhone and iPod touch are registered trademarks of Apple Inc., registered in the U.S. and other countries

DC16 CONTROL SURFACE:

- Dedicated Dante-connected control surface for the AXIS system
 - 17 full channel strips with Alps® 100mm motorized touch-sensitive faders and per channel encoders
 - Dedicated selected channel section with controls for fast access to important parameters
 - Mix selector and view groups deliver innovative navigation without preset banks
 - Ergonomic layout with generous working space for easy access to all controls
- Unmatched Visual Feedback
 - Large, full-color backlit channel ID screens with class-leading readability
 - · Flexible channel labeling including name, color and icon
 - 6-segment LED channel meters and 3-segement GR meters per channel
 - · Dedicated show display with snapshot control
- Surface to Wireless Mixing via SmartBridge™
 - Automatically senses presence of up to three iPad devices and changes Master Fader operation to deliver tight integration and customized functionality
 - Central iPad follows dedicated hardware controls for selected channel
 - Unique history and fixed display iPad modes provide flexible workflow options
 - Control up to four channels simultaneously from control surface and iPad devices
 - Grab any iPad and go for instant wireless mixing from anywhere in the venue
 - · Wired recording and playback to central iPad
 - · Built-in charging for all three iPad devices
 - Dedicated Wi-Fi router connection point
- Tough Professional Hardware
 - · All-steel chassis with aluminum front and back extrusions
 - Low profile, compact design fits seamlessly into any workspace
- Additional I/O For Your Axis System
 - 4×4 Dante via dual locking etherCON
 - XLR talkback input
 - I/8" stereo input
 - Control room/phones outputs

MASTER FADER CONTROL APP:

- Complete control over the AXIS system
- Intuitive design with proven workflow that's easy to master, easy to teach
- Quick setup with large library of factory and user-definable presets
- Access Limiting allows flexible customization of each device, preventing unwanted adjustments
- Export presets, shows and complete system backups via Dropbox, email and more using iOS system sharing
- · Complete offline operation allows system creation with just an iPad
- Pocketable control from iPhone and iPod touch
- Easy and frequent updates via App Store

^{*} Wi-Fi router and iPad required.
Wi-Fi router, iPad, iPhone and/or iPod touch not included.
Return channels and subgroups feature PEQ and compression.

5 mA max per mic,

with up to 32 simultaneously.

Individual digital controller per channel

DL32R / DANTE SPECIFICATIONS CONTINUED

USB -	Stre	aming
OOD	0110	anning

Connection: USB 2.0 High Speed (as a device)
Connector: USB-B

Supported MS Windows

[Driver installation required]: Windows 7, 8, 10

Supported Mac OS

[Audio Class 2.0 Compliant, no driver required]:

OS X 10.8.4, 10.9, 10.10, 10.11

Audio: 32 in / 32 out, 48 kHz, 16-bit / 24-bit

USB - HDD Recording / Playback

Connection:	USB 2.0 High Speed (as a host)
Connector:	USB-A
Audio:	I-32 channel, 48 kHz, I6-bit / 24-bit (multichannel .wav)
Supported Devices:	USB 2.0 / 3.0 Class Compliant HDD
HDD Format:	FAT32
Bus Power:	5V, IA max

Dante

Dante Ports:	2x Ethercon Gigabit Ethernet
Control Port:	Ix RJ45 Gigabit Ethernet Wi-Fi
Sample Rate:	48 kHz
Bit Depth:	24-bit
Transmit / Receive Channels:	32 / 32
Supports Dante Redundant and Switch modes	
Configuration via Dante Controller	

Streaming and HDD Record / Playback are not available simultaneously.

Supported Devices

iOS Version Requirement: For optimal performance, we suggest using the latest iOS version [iOS 8.0 minimum]

iPad Version Requirement

Wireless: All iPad models (except the original iPad), Future iPad devices²

iPhone / iPod touch Version Requirement

Wireless:

iPhone 4, iPhone 4S, iPhone 5, iPhone 5c, iPhone 5s, iPhone 6, iPhone 6s, iPhone 6 Plus, iPhone 6s Plus, iPod touch (5th generation), Future iPhone and iPod touch devices²

Control Application: Mackie Master Fader App³
Simultaneous Control: 20 iOS Devices

DSP

36 input channels with 4-band PEQ + HPF, gate and compression

- 32 stereo-linkable input channels
- 4 stereo-linkable return channels (PEQ and compression only)

28 output busses with 4-band PEQ + HPF/LPF, 3I-band GEQ, comp/limiter, alignment delay and RTA

- 14 stereo-linkable aux sends
- 6 stereo-linkable matrix busses
- 6 stereo-linkable subgroups (PEQ and compression only)
- Main L/R busses

6 VCAs and 6 mute groups

3 stereo FX processors (2 reverb, I delay) with dedicated sends and returns

Full I/O routing with A/B sources per channel

Assignable oscillator including pink/white noise and sine waves

Modern and Vintage options per processor

Power

Power Requirements:	100 VAC - 240 VAC, 50 - 60 Hz, Universal Supply
Power Consumption:	100 watts max
Line Cord:	User-replaceable IEC
Operating Temperature [extended ambient temperature]:	0 - 40 °C 32 - 104 °F

² This assumes, of course, that future iOS devices do not communicate via infrared, radiation, television, sparklers, hoagies, frickin' laser beams, or some other crazy, fandangled new contraption. Even then, we'll still give it the 'ol college try. After all, we do have sharks at the ready.
